

27 April 2021

Dear parents and caregivers,

Your P&C is on a mission to install six, foot-operated, refrigerated, filtered, twin water bottle filling stations around the school for our 2600+ students to access. The school has no funds available for this project, so that's where you come in.

For the first time in recent history, the P&C is asking for your help directly. In the past, a letter was included in the fee pack asking for voluntary contributions to the school's building fund which would then be used on projects such as this one. This year no pack was issued, so virtually no funds have been received.

Over the previous 5 years, the average collection through the voluntary contributions has been less than \$3000/year, just over \$1 per student.

We believe that the money these hydration stations will save our students on buying bottled water from the canteen for one year would pay for these to be installed, so we are asking you to dig deep to save our environment and help Hydrate the Reds.

The initial campaign has a target that will see 2 of the 6 stations purchased and installed as soon as possible. It will close at 5:00pm on 15 June.

Please click on the link below to make your tax deductible donation today.

TOGETHER WE CAN MAKE A DIFFERENCE IN OUR STUDENTS' SCHOOLING EXPERIENCE.
